

THE INNOVATION JOURNEY

Nutratch, spinoff of the University of Calabria, was founded as a company specializing in the nutraceutical field. The core business consists of the development of innovative technologies and products in the pharmaceutical field that act on processes involving physiological oxidative states correlated to the interaction between biomaterials and biological tissues, and the development of new in vitro and in vivo methods for determining oxidative stress.

THE INNOVATION IMPACT

Nutraceutical products comprise a broad spectrum of substances and food items providing medical or health benefits with the aim of prevention and treatment of disease, additionally to the nutritional values.

The nutraceuticals industry is on an exponential growth trajectory. Key drivers include an aging population

and demand for natural alternatives to pharmaceuticals, fueling growth in functional foods, beverages, and dietary elements.
