

THE INNOVATION JOURNEY

Galascreen is a spin-off of the University of Calabria which develops solutions in the lifescience. It intends to establish itself as a technical-scientific structure based on the combination of scientific knowledge and already acquired technologies.

THE INNOVATION IMPACT

The main purpose of the spinoff is to analyse the nutritional profile of Human Milk and Donor Human Milk in order to achieve targeted fortification of the food as well as an optimal preparation of minimal enteral feeding. Development of the medical device that determines the quantity of HM consumed over 24 hours to improve the integration of the missing feed.

The spinoff operates in the global market of nutrition and nutraceuticals, which shows high

growth rates, with a wide range of products across various sectors.

This market includes functional foods, dietary supplements, and other products offering health benefits beyond basic nutrition, and key trends include personalized nutrition and the demand for natural, clean-label products
